Importance: High

Hi Reuben,

Sorry I missed your call yesterday. Thanks for the reminder that the PRIA due date is tomorrow – yikes!

Attached are two files:

- 1) A copy of the master label with that you sent on Tuesday, with my responses to your comments/requested changes, included. I believe I addressed all your requested changes and comments. Thanks for catching some obvious misses on my part.
- 2) A new clean copy of the master label with the changes incorporated, ready for stamping, if you agree. See what you think.

I'm available today to give you a call to talk through any remaining questions or changes you'd like to see.

Annette

Hi Reuben,
Good news. Thanks very much. I'll take a look at your comments and get back to you asap.
Annette

Hi Annette,
Looks like we have the green light for the publication of the tolerances. Though they won't actually publish in the Federal Register for another week or two (don't get me started), we have the green light to go ahead and approve the labels. Please address the comments in the attached for Warrant. The tech is fine from my standpoint.

Once I receive the clean label back from you, I can approve and stamp.

Thanks.
Reuben

Subject: RE: Warrant NU on alfalfa - pdf copies of label for final review
Importance: High

Reuben,

See attached pdf copies of:

- the revised Master Label for MON 63410 Herbicide, Reg. No. 524-591 adding section 12 with use instructions for alfalfa
- the separate Supplemental label for use in alfalfa
- the Acetochlor Technical master label, Reg. No. 66478-1, adding alfalfa

You'll see in the Master Label for 524-591 that the only other significant change, besides adding sections for alfalfa, is a reformatting/rewording of the rotational crops section (5.0). This change simply breaks it out into sections for immediate replanting, use of cover crops, and then rotational crops – the intent is to make this section easier to understand and follow (we get a lot of questions about what crops are allowed in rotation).

Let me know if you have questions.

Have a good weekend.

Annette

Hi Annette,

I need the pdf, not word. I know it seems like semantics but I need it for our comparison software. I will need both the end use and the tech. Sorry, I should have specified that.

Just send it to me. Sarah is currently on detail to another division, so there's no need/benefit to including her on the communications. I deleted Tom from the chain assuming he doesn't care to be included on this either...

Thanks.

Reuben

Subject: RE: Warrant NU on alfalfa

Hi Reuben,

I'm working on this label now – just minor corrections to the supplemental label plus embedding a section for alfalfa into the Warrant master label along with a few other minor changes there. I agree the review should be straight forward. I can have Word versions of the master label and supplemental to you tomorrow (Friday), and following any changes you have, I can turn around clean copies for stamping.

I'll also need the acetochlor technical label approved at the same time. Do you need a new copy of that one as well?

Also, I had been communicating with Sarah on this new use, should I copy her in or just send them to you?

Thanks

Annette

Subject: Warrant NU on alfalfa

Hi Annette,

Can you send me the updated label for the new use on alfalfa? I'm hoping the label review will be pretty straight forward since we just went through this exercise with the peanuts and sugar beets...

Also, please note that we may need to renegotiate the PRIA date again due to publication delays. Just a heads up right now. Stay tuned on that front.

Thank you.

Reuben
